The IP addresses of the users are deleted or anonymized after the end of the usage. The data in the so-called log files are evaluated anonymously by us in order to further improve the website of Haffmans & Neumeister GmbH and to make it more user-friendly, as well as to find and correct errors more quickly. 2. Cookies

Cookies are small files that are stored on your data carrier and store certain settings and data for exchange with our system via your browser. Cookies cannot run programs or transmit viruses to your computer. They aim at making the Internet offer more user-friendly and effective.

Basically, two different types of cookies exist, so-called session cookies, which are deleted, as soon as you close your browser (= end of the session) and temporary / permanent cookies, which are stored for an extended period or unlimited on your data carrier. This storage helps us to design our website and makes it easier for you to use it, by storing specific entries so that you do not have to repeat them all the time. You may delete the cookies in the security settings of your browser at any time and configure your browser settings according to your needs (for example, accepting third party cookies or rejecting all cookies). As a rule, you will be shown how to reject new cookies and delete already received ones in the menu bar of your web browser. However, we would point out that you may not be able to use all the features of our website. On various pages of our website we use cookies to make visiting our website more attractive and to allow the use of certain functions. Most of the cookies we use are session cookies and are automatically deleted from your hard drive after the end of the browser session. In addition, we use permanent cookies that remain on your hard drive. During a subsequent visit the browser automatically recognizes that you were already with us and inputs the settings you prefer. These cookies will be stored on your hard drive and will be deleted by itself after the specified time.

The cookies used by us are not assigned to any specific person and therefore not assigned to you. When the cookie is activated, an identification number is assigned to it. An assignment of your personal data to this identification number is not possible at any time. It does not store your name or similar data that would allow the allocation of a cookie to you.
